

# Returning to the Workplace –

*Solutions guide*

# Giving our best, sharing our knowledge and helping you return to the workplace”

In these exceptionally challenging times, we're now encouraged to see business starting to return to the workplace, albeit in a different way to before. As part of our commitment to support business across the UK through the “Returning to the Workplace” journey, and following our Series of instructive Webinars launched in the recent days, I'm delighted to share our Solutions Guide to assist you with what you will need in the coming days to get operational safely, and happily.

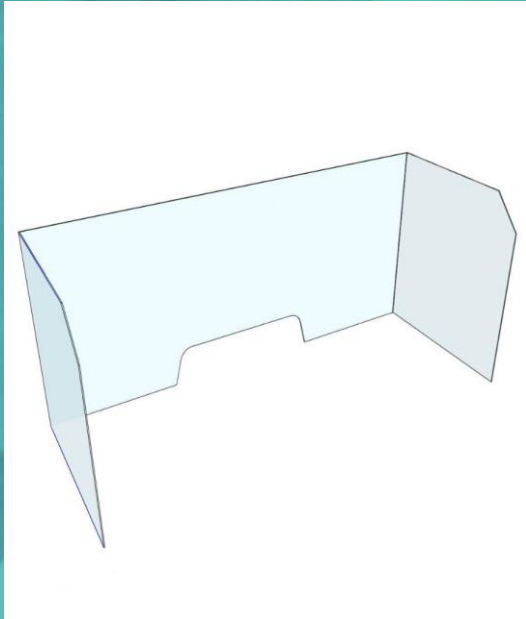

*Murray*

# Adjusting your office layout for the interim

With every building, office and business being unique (and not forgetting the requirements for things like fire regulations, disabled access etc) we are offering an immediate interim office layout service, showing you how you could adapt your building layout to enable social distancing, as easily as possible, at the lowest cost.

Simply send us your floor plan / layout, and any pictures of your workspace by email to [m.hibbert@ihguk.com](mailto:m.hibbert@ihguk.com)

# Workstation Screening

Wrap around screens

Single Panel Screens

Multi-screen sets

Clear roller screens

Protect individual workstations, and maintain maximum occupancy by installing clear screening to each workstation. Send us your desk size, and photos of your workstations to ensure a good fit.

# Mobile & Temporary Stations

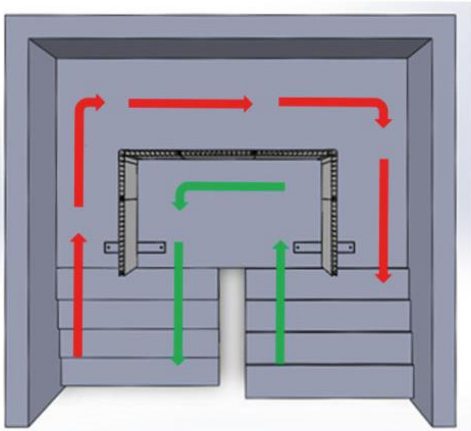

The ultimate solution for **mobile handwashing**, using the latest technology to provide a highly sanitary, safe and durable hand cleansing facility anywhere. An integral non-touch soap dispenser and mixer tap, along with a paper towel dispenser mounted on the splashback, means all facilities are included. The system is entirely touch-free to use. Placing hands under the tap will activate the water supply cycle automatically, using an infrared proximity sensor. The soap dispenser, with a reservoir capacity of up to 1.6L, also operates with an automatic infrared proximity sensor.

Looking to keep things more in keeping with your workspace design? We can help to convert a storagewall unit into a wash station alcove, including a sensor tap and sensor soap system.

# Social Distancing Screens

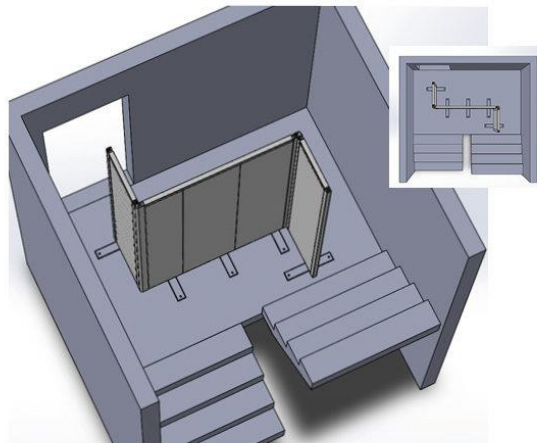

## STAIRWELL DEMARCATATION

DIRECTING THE FLOW OF TRAFFIC

## STAIRWELL DEMARCATATION

DIRECTING THE FLOW OF TRAFFIC

A highly flexible and adaptable solution to ensure access routes, stairways, communal zones can be managed easily. Also customisable to create temporary segregation within open plan areas. Screens can be branded to minimise visual impact and ensure the look is in keeping with your core workspace environment.

# Signage Solutions

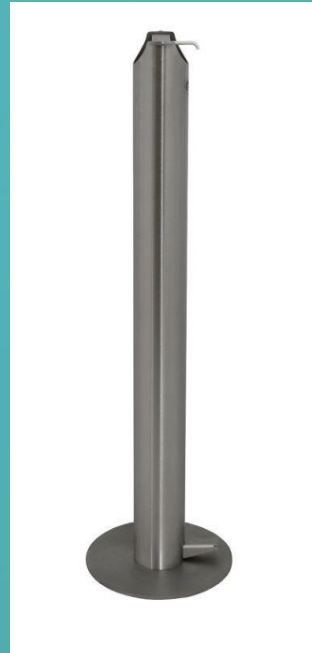

Like we have fire signage within our buildings, use this same method of communication to keep reminding people of the rules and requirements. A set of rigid plastic and customisable signs to install, from the front to the back of your building.

# Hand Sanitiser Solutions

Foot controlled pump station

Single and multi point stations

A range of temporary and moveable sanitary stations, including a hands free solution for ultimate hygiene.

# Air Purification & Surface cleaning

Deactivates and destroys micro-organisms

Increased filtration within the HVAC

Alcohol mist spray solution to clean surfaces

With Covid-19 being an airborne virus, it's important to consider the air quality within your office. A range of solutions, from stand alone Ozone purification machines to in-system filtration solutions. Along with this, an industrial sized alcohol mist solution to quickly cleanse all solid surfaces.

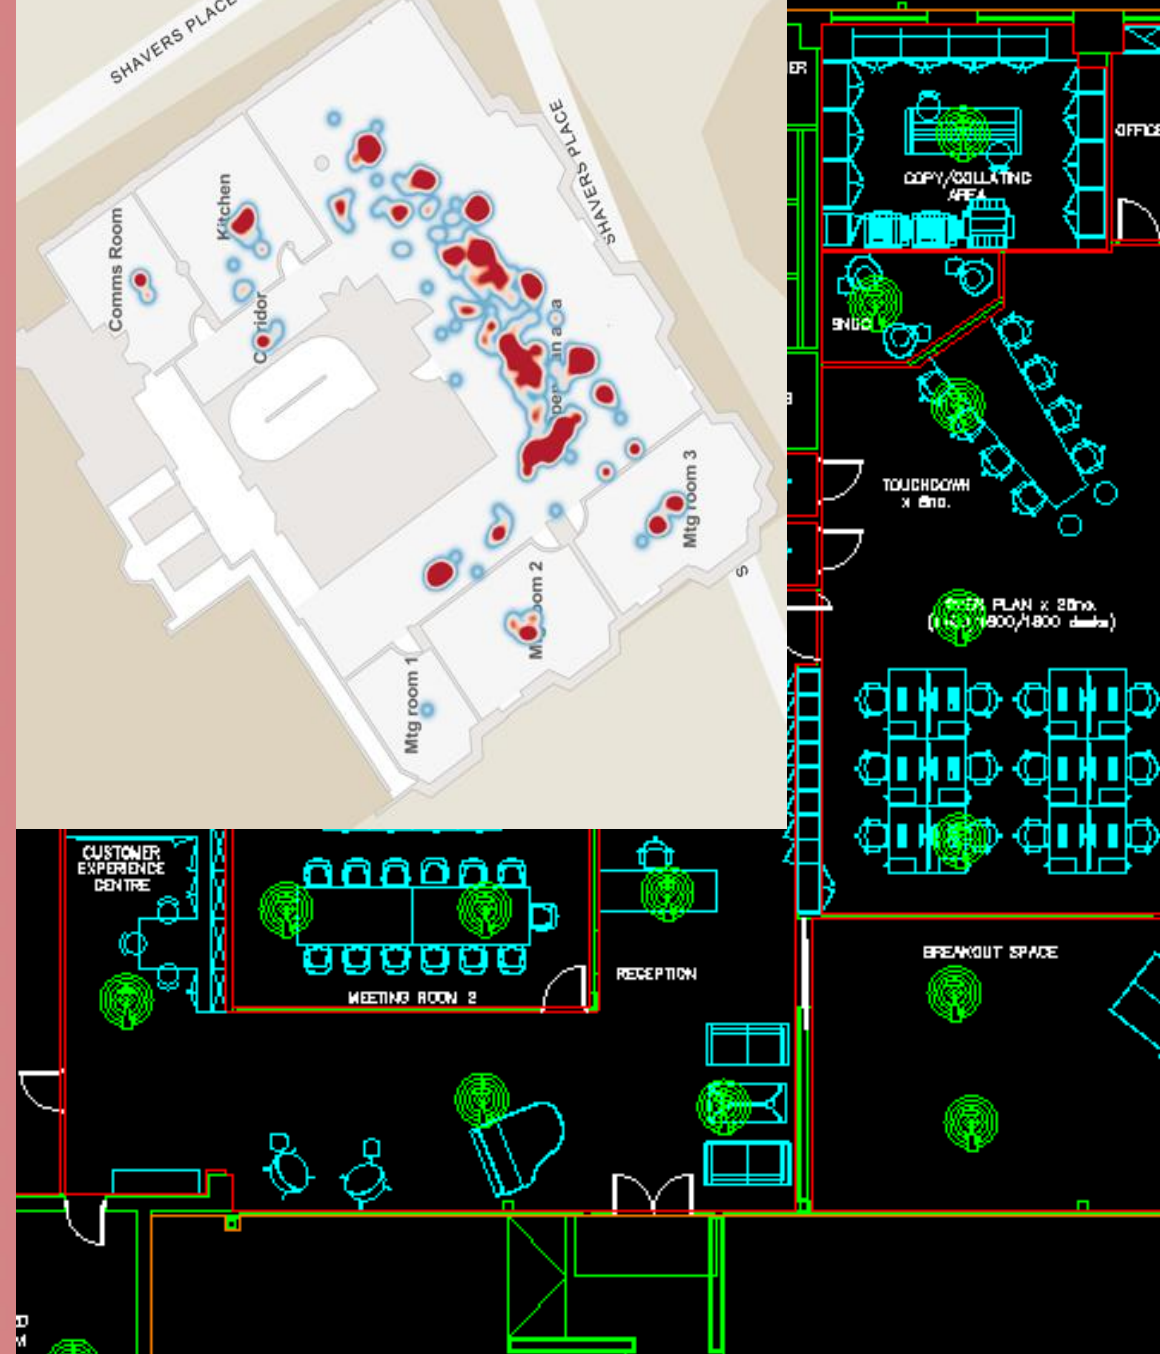

# Heat sensor entry systems

With minimal impact, and long term benefit, this CCTV camera here can detect body temperatures and alert the administrator at point of entry to your building. Preset to detect predominant symptoms of Covid-19, this solution can be used to prevent users of office buildings from spreading the virus.

# What the long term change looks like...

With recent data collected on Friday 24<sup>th</sup> April via a live poll to over 120 companies including global corporates to SME, we're predicting that every 1 in 5 people that typically worked in an office space will work remote. Our very own App will enable you to truly determine your future workspace – [www.habitationapp.com](http://www.habitationapp.com)

# Where do I go from here?

The Team here at Habit Action are fully operational online, and on a number of our construction sites too.

**Get in touch today** with Murray to discuss your specific needs, and develop your customised solution – no building, office or business is the same, and it's critical you consider all aspects.
